

LEG CURLING / 1FW182

The Leg Curling is aimed to the isolation of hamstrings in prone and supine position. It stands out for:

- physiological load curve with lever system;
- adjustable thrust roller;
- counterweight to reset the empty weight of the exercise lever;
- modified ventral padding to leave more freedom to the chest ;
- introduction of new paddings for the elbows support and double support handle that adapt to different users sizes.

Optional:

- 2 additional weight holders

MUSCLES
